## MAY GREEN TIP

*From the green school project*

The average American commutes to work 16 miles each way, and the average car gets under 23 mpg, which equates to about 7 gallons of gas per week to commute. With gas prices now climbing to \$4 per gallon — that's about \$28 a week, or nearly \$1,500 a year! Share your ride and the gas bill with just one friend and you each save \$750 a year! For more information go to: [www.greenschoolproject.com](http://www.greenschoolproject.com)
